Heykal said that the U.S. has supplied Jordan with more than 300 M-60 tanks and about 100 warplanes in the past year for the conquest of Syria. He went on to say that Jordan also received be-tween \$110m. and \$115m. worth of U.S. military hardware such as long-range artillery and troop transport planes.

Cairo's emphasis on Jordan's alleged conspiracles against Syria indicated that Egypt was seeking a way to step up its pledge of support to the terrorist movement in its bld to topple King Hussein's regime. It further indicated that Cairo might consider providing military aid to the terrorists in their struggle against Hussein, Such support to the terrorists was earlier pledged by Libya and Algeria, whose leaders Sadat is due to meet at a summit conference in Algiers early

NEW ARMS

The accent is on the word "advanced." The 175-millimetre : gun, for instance, qualifies among the latest in design and most effective of artillery pieces of its kind now in service anywhere. Its range, almost uncanny ac-curacy and mobility (self-prounits) added to that of the 155-millimetre gun, possession of which was announced last year, have given the Israeli ar-tillery corps an entirely new dimension.

The new stress on artillery indicates new tactical thinking. The big guns for long had a low priority rating on the de-fence budget. It was difficult to compete with the heavy Soviet guns used by Egypt along the Canal, artillery having long been a Russian speciality. For several years air power was used to silence the guns, until the in-troduction of the Sam anti-aircraft batteries made this costly. The new guns will be less sensi-tive to the missiles.

Chief of Staff Elazar has denied that the guns are intended to provide protection in the event of a partial withdrawal.

The new M60 — the latest reneration of the battle-tried Patton tank family, which is the nainstay of U.S. armoured units, will add more punch to the Israel armoured corps units, which already enjoy a distinguished re-outation in battle. This will be he first time the army is get-ing brand new medium tanks.

The only other new tanks ever received by the corps were the French light AMX, which were no match, on paper, for the Soviet built "T" series although they were used successfully against them. The AMXs were basically light reconnaissance anks. The Israeli armoured corps has so far been built up-mainly of left and anierican from European and American military junkyards, and battle

1. Maintaining open doors for immigration is one of the basic causes of our dispute with the Arabs. The physical job of guarding the borders falls exclusively upon the youth of this country at untold cost to them and to the State.

More mature chizens are required to spend weeks at a time on reserve duties, again causing untold losses to selfemployed people, dislocating business and harming the aconomy.

There is no doubt that the necessity of housing immigrants has caused shortages and higher prices and made it more difficult and expensive for Israelis to acquire homes.

The spending of public money on immigration led to constant inflation resulting in repeated devaluations, Each devaluation has reduced the spending power of any money saved by the Israeli resident, so that anyone who started saving in 1948 to buy a home might be just as far from his objective 25 years later.

Immigrants arriving here with money have also helped to force prices up beyond the capacity of the local resident.

All this, of course, does not rule out Israelis' cash contributions in local campaigning and also in taxes covering educational, health and social services which Zionist funds from abroad are inadequate to cover.

come, Mr. Dulzin! Why abandon the most effective argument in persuading Disspore Jews to do their duty and relieve the Israelis of having to bear a disproportionate share of the common burden?

The car was blown up with a Mills-4 handgrenade, which also damaged two other cars parked nearby.

Detective Sergeant-Major Yehezkel Nahum told the court the bombing was carried out because of quarrels between Ackerman and his divorced wife, the sister of Sergeant Mendelson. Ackerman, he said, carried a grudge against Sergeant Mendelson because he believed the sergeant was instrumental in having files on his complaints against his former wife closed without actions being taken on them.

Judge Yosef Megory-Cohen instructed that Ackerman be released on IL2,000 bail, but agreed to police request to hold him for 48 hours, pending appeal of the decision to the District Court. (Itim)
